## Reusable Heater

### Re Bao

How it works:

A sodium acetate heat pad is a reusable heat reservoir. It contains a supersaturated solution of sodium acetate ( $\text{NaCH}_3\text{COO}$ ). Crystallization is triggered by flexing a small flat disc of notched ferrous metal embedded in the liquid. Pressing the disc releases very tiny adhered crystals of sodium acetate[1] into the solution which then act as nucleation sites for the recrystallization of the remainder of the salt solution. Be (...)
